

Farmers Market

Overview

Members are the vendors who have a booth at the weekly market. They can post info about their farm, what they sell, and when they'll be at the market.

Special Features/Technologies

- JavaScript to sort/filter search results with PHP fallback
- PHP image upload
- As vendors will likely be typing products freely, ensure consistent presentation/rendering of product capitalization via CSS
- As vendors will likely be typing products freely, integrate spell checker for vendors as they enter data

Experience

General Public

- View details about the market and which vendors will be there on a specific date
- View details about each vendor
- Search/filter/sort (JavaScript opportunity) for an item (micro greens, beef, kale, ...) and see a list of vendors who will be selling that at the next market
- See details and contact information for "if you want to be a vendor"

Members (Vendors)

- Upload photo
- Indicate which weekly markets they will be at
 - The last week of each month, they must indicate their intent for the following month
- List items they will carry/sell at the market
- Post brief description of their farm/philosophy

Admins

- Create vendor accounts
- Activate/deactivate users
- Manage general home page content such as replacing photos and updating hours, location, and contact information via a backend CMS
- Edit/override vendor intent to be present at a market

Super Admin

- Everything admins can do, plus...
- Activate/deactivate admins
